# Knockout.js: Building Dynamic Client-Side Web Applications

*By Jamie Munro*

**Knockout.js: Building Dynamic Client-Side Web Applications** By Jamie Munro

Use Knockout.js to design and build dynamic client-side web applications that are extremely responsive and easy to maintain. This example-driven book shows you how to use this lightweight JavaScript framework and its Model-View-ViewModel (MVVM) pattern. You'll learn how to build your own data bindings, extend the framework with reusable functions, and work with a server to enhance your client-side application with persistence. In the final chapter, you'll build a shopping cart to see how everything fits together.

If you're a web developer with experience in JavaScript, HTML, and CSS, you're ready for Knockout.

- Learn how to create a ViewModel
- Bind HTML data and attributes, and CSS classes and styles
- Understand data binding in Knockout's context hierarchy
- Use properties that change dynamically through user interaction
- Work with forms by using several different bindings
- Bind multiple ViewModels on a single page
- Extend or attach custom functions to observables
- Perform server-side interactions with jQuery
- Map a JavaScript object or apply JSON data to a new object

## Editorial Review

About the Author

The author of *20 Recipes for Programming MVC 3* from O'Reilly Media, Jamie Munro has been developing websites and web applications for over 15 years. For the past 6 years Jamie has been acting as a lead developer by mentoring younger developers to enhance their web development skills. Taking his love of mentoring people, Jamie began his writing career on his personal blog (http://www.endyourif.com) back in 2009. As Jamie's blog grew in success, he turned his writing passion to books about web development. As well as writing books, Jamie is currently in the process of starting a new website (http://www.webistrate.com) that is geared towards helping web developers further expand their experience with many online examples using MVC3, CakePHP, CodeIgniter, Jquery, Database Optimzation, and Search Engine Optimization.

## Users Review

**From reader reviews:**

**James Stewart:**

What do you in relation to book? It is not important to you? Or just adding material when you want something to explain what you problem? How about your time? Or are you busy individual? If you don't have spare time to complete others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Everybody has many questions above. They need to answer that question mainly because just their can do this. It said that about book. Book is familiar in each person. Yes, it is right. Because start from on pre-school until university need that Knockout.js: Building Dynamic Client-Side Web Applications to read.

**Ann Bland:**

Playing with family inside a park, coming to see the coastal world or hanging out with friends is thing that usually you might have done when you have spare time, then why you don't try matter that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Knockout.js: Building Dynamic Client-Side Web Applications, you can enjoy both. It is great combination right, you still wish to miss it? What kind of hang-out type is it? Oh can occur its mind hangout folks. What? Still don't have it, oh come on its referred to as reading friends.

**Lorraine Vargas:**

Would you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Try and pick one book that you never know the inside because don't determine book by its protect may

doesn't work the following is difficult job because you are frightened that the inside maybe not since fantastic as in the outside search likes. Maybe you answer could be Knockout.js: Building Dynamic Client-Side Web Applications why because the fantastic cover that make you consider with regards to the content will not disappoint an individual. The inside or content is fantastic as the outside or even cover. Your reading sixth sense will directly assist you to pick up this book.

**Marcie Johnson:**

You may spend your free time to learn this book this book. This Knockout.js: Building Dynamic Client-Side Web Applications is simple bringing you can read it in the area, in the beach, train as well as soon. If you did not get much space to bring often the printed book, you can buy the particular e-book. It is make you quicker to read it. You can save often the book in your smart phone.
