Star One: Neutron Star By Raymond L. Weil

It is the year 2044 on Earth. At the Farside observatory complex on the Moon, a startling astronomical discovery has been made. A survey for pulsars has found an x-ray source in a region of space where none has been detected before.

Upon further investigation, they find that this x-ray source is just outside of the Solar System. The astronomers are paralyzed by what they have found knowing what its disastrous ramifications might be.

A neutron star is approaching the Solar System. It appeared out of a small dust cloud that was shielding its approach. Armageddon has arrived; the star is on a trajectory that will take it through the center of the Solar System. Life on Earth will not survive its passing.

The only hope for survival will be on the massive Star One space station at the Earth-Moon Lagrange point or possibly in Tycho City deep beneath the Moon's surface. It will be a race against time to save a fraction of the Earth's frightened population.

Books in the Star One series.

Editorial Review

Users Review

From reader reviews:

James Nadler:

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite publication and reading a book. Beside you can solve your problem; you can add your knowledge by the book entitled Star One: Neutron Star. Try to the actual book Star One: Neutron Star as your pal. It means that it can to get your friend when you truly feel alone and beside those of course make you smarter than ever before. Yeah, it is very fortuned in your case. The book makes you considerably more confidence because you can know almost everything by the book. So , let me make new experience in addition to knowledge with this book.

Alison Caulfield:

What do you think of book? It is just for students because they are still students or that for all people in the world, what the best subject for that? Just simply you can be answered for that concern above. Every person has different personality and hobby for each other. Don't to be pressured someone or something that they don't would like do that. You must know how great and important the book Star One: Neutron Star. All type of book could you see on many sources. You can look for the internet sources or other social media.

Will Cathcart:

A lot of people always spent their own free time to vacation or perhaps go to the outside with them family or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or playing video games all day long. If you would like try to find a new activity that's look different you can read some sort of book. It is really fun for you. If you enjoy the book which you read you can spent the whole day to reading a reserve. The book Star One: Neutron Star it is rather good to read. There are a lot of those who recommended this book. These folks were enjoying reading this book. Should you did not have enough space to deliver this book you can buy the particular e-book. You can m0ore very easily to read this book from the smart phone. The price is not too costly but this book features high quality.

Alfredo Dunn:

This Star One: Neutron Star is great publication for you because the content that is full of information for you who all always deal with world and possess to make decision every minute. This specific book reveal it information accurately using great coordinate word or we can declare no rambling sentences within it. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only provides straight forward sentences but tough core information with beautiful delivering sentences. Having Star One: Neutron Star in

your hand like obtaining the world in your arm, details in it is not ridiculous a single. We can say that no reserve that offer you world within ten or fifteen moment right but this reserve already do that. So , this really is good reading book. Hey Mr. and Mrs. stressful do you still doubt that will?
