## **Editorial Review**

From School Library Journal

PreSchool-Grade 2 This book, aside from being visually unappealing full of orange, white, and black sketches of wide-eyed and open-mouthed kids is a puzzlement. The rambling text explains that women have breasts so they can make milk and feed it to their babies, but that even Sumo wrestlers who have big breasts don't make milk. That's it. It's an incredibly unattractive book and the amateurish illustrations do nothing to explain the process. The milk ducts look like cauliflower florets in a strainer and the drawings of a baby and its mother's breast look more like the child is playing with Snoopy's nose or two Junior Mints. Christine A.

From Kirkus Reviews

Following the success of Taro Gomi's *Everyone Poops* (1993, not reviewed), this is a similarly direct picture book from Japan, and more crudely done. Laughing at two children who think he's wearing a bra, a hefty man explains that it's only a belt over a tank top, then launches into a brief, patchy question-and-answer that covers the physical development of breasts (in women), nursing ``When a baby grabs hold of the breast and sucks on the nipple (glug glug glug), milk flows from it'' and why most people don't remember much of their babyhood. The two-color illustrations depict a series of mostly bare-chested men, women, and children, drawn with thick black lines and filled with a garish orange. Enlighten curious children by sharing relevant passages from such guides as Robie Harris's *It's Perfectly Normal* (1994) instead. (Picture book. 5-7) --
