Soft Computing: Neuro-Fuzzy and Genetic Algorithms By Samir Roy, Udit Chakraborty

Soft computing is a branch of computer science that deals with a family of methods that imitate human intelligence. This is done with the goal of creating tools that will contain some human-like capabilities (such as learning, reasoning and decision-making). This book covers the entire gamut of soft computing, including fuzzy logic, rough sets, artificial neural networks, and various evolutionary algorithms. It offers a learner-centric approach where each new concept is introduced with carefully designed examples/instances to train the learner.

Editorial Review

Users Review

From reader reviews:

Holly Silva:

Do you have favorite book? When you have, what is your favorite's book? E-book is very important thing for us to learn everything in the world. Each reserve has different aim or even goal; it means that publication has different type. Some people experience enjoy to spend their time and energy to read a book. They are reading whatever they have because their hobby is actually reading a book. How about the person who don't like reading a book? Sometime, particular person feel need book when they found difficult problem or exercise. Well, probably you will want this Soft Computing: Neuro-Fuzzy and Genetic Algorithms.

Silvia McElroy:

Inside other case, little persons like to read book Soft Computing: Neuro-Fuzzy and Genetic Algorithms. You can choose the best book if you appreciate reading a book. As long as we know about how is important the book Soft Computing: Neuro-Fuzzy and Genetic Algorithms. You can add know-how and of course you can around the world by way of a book. Absolutely right, simply because from book you can know everything! From your country right up until foreign or abroad you may be known. About simple point until wonderful thing you may know that. In this era, you can open a book or searching by internet device. It is called e-book. You can use it when you feel fed up to go to the library. Let's study.

Michelle Bachman:

What do you think about book? It is just for students since they're still students or that for all people in the world, the actual best subject for that? Simply you can be answered for that concern above. Every person has different personality and hobby for each other. Don't to be pushed someone or something that they don't would like do that. You must know how great along with important the book Soft Computing: Neuro-Fuzzy and Genetic Algorithms. All type of book would you see on many options. You can look for the internet methods or other social media.

Helen Massey:

Is it you actually who having spare time and then spend it whole day simply by watching television programs or just lying on the bed? Do you need something totally new? This Soft Computing: Neuro-Fuzzy and Genetic Algorithms can be the response, oh how comes? It's a book you know. You are and so out of date, spending your extra time by reading in this new era is common not a nerd activity. So what these publications have than the others?
