Geometry in a Fréchet Context: A Projective Limit Approach (London Mathematical Society Lecture Note Series)

By C. T. J. Dodson, George Galanis, Efstathios Vassiliou

Geometry in a Fréchet Context: A Projective Limit Approach (London Mathematical Society Lecture Note Series) By C. T. J. Dodson, George Galanis, Efstathios Vassiliou

Many geometrical features of manifolds and fibre bundles modelled on Fréchet spaces either cannot be defined or are difficult to handle directly. This is due to the inherent deficiencies of Fréchet spaces; for example, the lack of a general solvability theory for differential equations, the non-existence of a reasonable Lie group structure on the general linear group of a Fréchet space, and the non-existence of an exponential map in a Fréchet–Lie group. In this book, the authors describe in detail a new approach that overcomes many of these limitations by using projective limits of geometrical objects modelled on Banach spaces. It will appeal to researchers and graduate students from a variety of backgrounds with an interest in infinite-dimensional geometry. The book concludes with an appendix outlining potential applications and motivating future research.

Editorial Review

About the Author
C. T. J. Dodson is Emeritus Professor of Mathematics at the University of Manchester.

George Galanis is Associate Professor in the Section of Mathematics at the Hellenic Naval Academy in Piraeus, Greece.

Efstathios Vassiliou is a former Associate Professor in the Department of Mathematics at the University of Athens. Since his retirement he has been a staff member in the postgraduate program on Didactics and Methodology of Mathematics in the same department.

Users Review

From reader reviews:

Rodney Bryant:

In this 21st hundred years, people become competitive in every single way. By being competitive right now, people have do something to make them survives, being in the middle of often the crowded place and notice by means of surrounding. One thing that at times many people have underestimated that for a while is reading. Yep, by reading a publication your ability to survive increase then having chance to stay than other is high. For yourself who want to start reading a new book, we give you this particular Geometry in a Fréchet Context: A Projective Limit Approach (London Mathematical Society Lecture Note Series) book as beginning and daily reading guide. Why, because this book is more than just a book.

James Brady:

Typically the book Geometry in a Fréchet Context: A Projective Limit Approach (London Mathematical Society Lecture Note Series) has a lot of information on it. So when you check out this book you can get a lot of help. The book was published by the very famous author. Mcdougal makes some research prior to write this book. This specific book very easy to read you can obtain the point easily after scanning this book.

Latonya Sams:

In this period globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for you is Geometry in a Fréchet Context: A Projective Limit Approach (London Mathematical Society Lecture Note Series) this publication consist a lot of the information of the condition of this world now. This book was represented how does the world has grown up. The words styles that writer

use for explain it is easy to understand. The actual writer made some study when he makes this book. This is why this book appropriate all of you.

Gilbert Phillips:

Reading a publication make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is composed or printed or highlighted from each source which filled update of news. On this modern era like currently, many ways to get information are available for you actually. From media social like newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just trying to find the Geometry in a Fréchet Context: A Projective Limit Approach (London Mathematical Society Lecture Note Series) when you essential it?
