Editorial Review

Review

"There is no textbook as comprehensive as the Pauk [How to Study in College] textbook! I urge students to buy the book as they would a dictionary or thesaurus AND especially if they plan to transfer. The added content that is now available electronically is perfect because there are times I have to teach this class as an independent study - due to low enrollment - and this is perfect for those students."

"The Concept Maps work effectively to give students "advanced organizers," of the chapter ahead; I point out the concept maps early in the semester and we discuss the ways in which they can be used as a survey tool and, later, as a review tool (because the arrows visually link up the topics in a chapter and because the student can quickly find something to revisit for increased clarification and review)."
