The Immune System, 3rd Edition By Peter Parham

The Immune System, Third Edition emphasizes the human immune system and synthesizes immunological concepts into a comprehensible, up-to-date, and reader-friendly account of how the immune system works.

Written for undergraduate, medical, veterinary, dental, and pharmacy students in immunology courses, it makes generous use of medical examples to illustrate points.

The Third Edition has been extensively revised and updated and includes two new chapters on innate and adaptive immunity, which explore the physical, cellular, and molecular principles underlying these responses to infection. It also features enhanced coverage of aspects of innate immunity such as the complement system, Toll-like receptors, defensins, and C-reactive protein; the role of dendritic cells in initiating the primary adaptive immune response and the functions of other cells that bridge innate and adaptive immunity; immunotherapies using humanized monoclonal antibodies to treat certain diseases; and the nature of the immune response in the mucosal tissues and immunological memory. The book offers over 500 full-color illustrations that complement and clarify the concepts. The end-of-chapter questions have been expanded and include essay, multiple-choice, and case study questions, with answers provided at the end of the book.

Editorial Review

Review

Praise for the Second Edition: "...Appealing and relevant for those students who approach the study of the immune system through a clinical lens, including students of medicine, pharmacology, midwifery, or nursing; it would also be appropriate in an introductory immunology course." *Clinical Immunology*

About the Author

Peter Parham is on the faculty at Stanford University where he is a Professor in the Departments of Structural Biology, and Microbiology and Immunology.

Users Review

From reader reviews:

Danny Chamberland:

Do you have favorite book? For those who have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each publication has different aim or maybe goal; it means that book has different type. Some people really feel enjoy to spend their a chance to read a book. They can be reading whatever they have because their hobby is actually reading a book. How about the person who don't like studying a book? Sometime, man feel need book when they found difficult problem or exercise. Well, probably you will require this The Immune System, 3rd Edition.

Allan Kean:
