Dreams of a Final Theory By Steven Weinberg

This is the story of a grand scientific quest: the quest for a unifying theory of nature--one that can explain forces as different as the cohesion inside the atom and the gravitational tug between the sun and the earth. Writing with dazzling elegance and clarity, Nobel Prize-winning physicist Steven Weinberg retraces the steps that have led modern scientists from relativity theory and quantum mechanics to the notion of superstrings and the idea that our universe may coexist with others. Along the way, he voices the questions that are always present: Why does each explanation of the way nature works point to other, deeper explanations? Why are the best theories not only logical but beautiful? And what implications will a final theory have for our philosophy and religious faith? Intellectually daring, rich in anecdote and aphorism, Dreams of a Final Theory launches us into a new cosmos and helps us make sense of what we find there.

Editorial Review

About the Author

Steven Weinberg received the 1979 Nobel Prize for Physics for his work in unifying two of the fundamental forces of nature, and in 1991 he was awarded the National Medal of Science at the White House. His earlier prize-winning book *The First Three Minutes* is the classic account of the "Big Bang," the modern theory of the origin of the universe. Among his other books are *The Theory of Subatomic Particles* and *Gravitation and Cosmology: Principles and Applications of the General Theory of Relativity*. Steven Weinberg is a member of the Royal Society of London as well as the US National Academy of Sciences, and has been awarded numerous honorary degrees, most recently from Columbia University and the Universities of Salamanca and Padua.

Stuart Langton is an award-winning theater, film, and television actor. He has been an audiobook narrator for more than ten years. He lives in New York City.
